372a6038bcDetection of the newest strain of poliovirus, Sabin 3, in sewage samples. The isolation of poliovirus from sewage samples may confirm the transmission of the virus via the fecal-oral route and may also indicate the circulation of nonvaccine poliovirus strains. Sera from 24 patients in Copenhagen with paralytic poliomyelitis and from 9 sewage samples in Copenhagen were screened for antibodies against poliovirus and Sabin 3 virus strain. The highest percentage of positive antibody titers (57.3%) against Sabin 3 was found in sewage samples No. 4 and No. 6. However, all the patients had received Sabin 3 vaccine before the disease developed. The antibody titer was not detected in the sewage samples between the time of vaccination and onset of disease. Severity of the asthma-cough syndrome: Part 2. The first part of this article dealt with the physiological events following an inhalation of irritant lung-lining secretions such as in bronchitis. This part will present the clinical picture, the natural history of this condition, the therapeutic modalities, and the order of events which occur during an asthma-cough attack. It will be shown that the cough itself may be a major diagnostic tool in the evaluation of some of these patients. Q: Sort a dictionary by key, but keep the values intact I have a dict of the form {'dict\_key1': [], 'dict\_key2':[], 'dict\_key3':[]...}. I need to sort the dict with respect to the key, but I want to keep the order of the list of values around the keys,
